## REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

### **Claims 1-28 are allowed.**

Present invention is drawn to method and system for mapping multiple logical links between network nodes onto physical paths. Each of the independent claims 1, 14 and 22 identifies a unique combination of features to realize such mapping. The unique combination is highlighted below (taking claim 1 as an example, understanding that claims 14 and 22 have essentially the same feature):

*... obtaining one or more mapping options for mapping multiple logical links between a first pair of network nodes and a second pair of network nodes ... sharing at least one node, onto physical paths that are at least relatively disjoint ...*

*obtaining a maximum time delay allowed between each pair of network nodes; and correlating mapping options with the maximum time delay ...*

In other words, present invention provides a uniquely distinct mechanism for finding physical paths between two network nodes that provides robust routing options in an event of resource failure without compromising transmission delay.

The arts applied throughout the prosecution of present invention, believed to be the closest, including Holender (US 6,069,894), Bertin (US 5,600,638), Doverspike (US 2002/0097671), Wolpert (US 6,577,601), also disclose finding routing options and network delays between network nodes. However, these arts, singularly or in combination, failed to anticipate the particular combination of such the present invention proposes, or render it obvious. For this reason, **claims 1, 14 and 22** are allowed, together with other claims depending therefrom.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
